Subject: Re: 2019 GW Monitoring Rpt for Hydro Extrusions, Cressona, PA

Hi Barbara,

Great news, thank you!

We agree with EPA's recommendations and your comments. The local potable water is pulled from a reservoir near Pottsville by the water district.

Hi all –

EPA reviewed the Subject GW Report, which recommends reduced GW monitoring at that Cressona Facility in PA.

I reviewed it and have attached my comments on the Report. To summarize, EPA agrees with reduction in GW monitoring at the Facility and recommends significant GW monitoring reduction, based on the data in the GW Report. Feel free to discuss this more with me if you like.

Barbara Smith
